<ul style="list-style-type: none"> NFPA 1001 (2008): 6.4.1 	<ul style="list-style-type: none"> All responders 	<ul style="list-style-type: none"> Scene safety, vehicle stability, tool safety, natural gas leak procedures

Scenario

Your company is dispatched to a report of a car vs. building auto accident. The vehicle has hit a single family dwelling which was occupied at the time of the incident. The driver is still in the auto, is unconscious and the vehicle is resting part in and part out of the home. Extrication will be needed to remove the victim from the front seat of the car as the steering wheel and dashboard have collapsed onto the victims lap. Access to the drivers door is limited by the side of the house. Police are on the scene and with bystanders, are beginning to search the interior. Upon arrival, you hear and smell a natural gas leak from an unknown location. *Using local SOP's develop a step-by-step initial action plan for this incident.*

Describe the Actions You Will Be Taking in This Incident Set your priorities, determine how you evaluate your progress, consider your follow-up or on-going responsibilities	Action Plan Outline your plan for handling this incident
Scene Size-up (Priorities)	
Initial Radio Report & Initial Crew Orders	
Crew Safety Factors / Concerns	
Tools Utilized for Mitigation and Rescue	
Initial and Additional Resources Required
