Are You Smarter Than A Recruit Firefighter? Category: Roof Styles and Operations

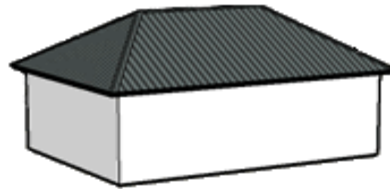

There are many styles and types of roofs that will require specific tactics and safety considerations for companies who work on top of as well as below them. Identify by local terminology, the roof style and any operational hazards that exist with them. **The Recruit should be able to identify the roof style while our Veteran firefighters provide valuable insight as to the operational procedures and safety hazards for each style.** Refer to your training manuals and department SOP's for additional guidance. Locate these roof styles in your response areas!
