The Fireground Playbook

NFPA Objectives (JPR's)	Job Levels	Critical Safety Points	Subject / Operation
<ul style="list-style-type: none"> NFPA 1001, 1002, 1021, 1026 	<ul style="list-style-type: none"> Firefighter, Apparatus Operator, Company Officer, I/C 	<ul style="list-style-type: none"> PPE, Scene safety, hazard ID and control 	Vehicle Fire Attack

Scenario: Your company will discuss the roles and responsibilities of each member for vehicle fire attack operations. Describe or demonstrate the skill or knowledge listed under the title that most closely resembles your job duties for the given scenario. Emphasize crew and individual safety responsibilities in each step and describe how you accomplish the skill. Refer to local SOP and training references for information on the required procedures.

Firefighter I	Firefighter II	Driver Operator	Company Officer	Incident Commander
Don assigned PPE	Ensure all crew members are in safe riding positions and know scene duties before arrival	Operate vehicle safely and position to best blocking and safety position	Ensure all personnel in seated and belted position before vehicle moves	Monitor dispatch for appropriate response level and scene location information
Assess scene hazards	Monitor scene hazards and determine control methods	Supply initial attack hose line with tank water	Perform size-up of critical incident scene factors	Establish and maintain command and control of incident
Advance assigned attack line	Assist in advancement of attack line in back-up position	Establish positive water source as needed	Transmit initial an on-going radio reports relating to the incident	Identify and mitigate hazards
Operate hose stream from safe distance and extinguish fire	Back-up firefighter I in advancement of line	Provide support of attack crews with tools and equipment as needed	Develop and implement an initial incident action plan	Upgrade or downgrade response
Provide control of fire during overhaul	Gain access and overhaul all areas of vehicle	Assist in traffic control management and safety monitoring	Supervise company members throughout incident and monitor all safety hazards	Ensure documentation and investigation processes are complete

All Levels: Return all equipment and apparatus to service.
